C708 Shake
Shake Freezer
Single Flavor, Pump, Heat Treatment

Features
Serve classic thick shakes. Direct draw a single flavor, or blend in flavoring for more variety. Viscosity is continually measured to ensure finished product consistency.

Heat Treatment System
Provides a daily heating and cooling cycle to safely maintain dairy products up to 28 days before a complete disassembly and cleaning is required.

Freezing Cylinder
One, 3.4 quart (3.2 liter).

Mix Hopper
One, 20 quart (18.9 liter). Refrigerated to maintain mix below 41°F (5°C) in Auto and Standby modes. Simplified air/mix pump delivers the precise amount of air and mix to the freezing cylinder, and reduces operator parts.

Indicator Lights
Mix Low light alerts the operator to add mix. When the Mix Out light flashes, the unit automatically goes into Standby mode to prevent damage.

Touch Screen Controls
Microprocessor touch controls are embedded in durable tempered glass panel. Multiple languages are selectable. History of temperatures and times during the last 366 heat cycles may be viewed from the fluorescent display from within the Manager’s menu.

Standby
During long no-use periods, the standby feature maintains safe product temperatures in the mix hopper and freezing cylinder.

Door Interlock System
Protects the operator from injury as the beater will not operate without the dispensing door in place.
