H60
Shake Freezer
Four Flavor

Features
Offer four separate shake flavors: chocolate, strawberry, vanilla (unflavored shake mix) and an optional flavor.

Heat Treatment System
Provides a daily heating and cooling cycle to safely maintain dairy products up to two weeks before a complete disassembly and cleaning is required.

Freezing Cylinder
One, 7 quart (6.6 liter).

Mix Hopper
One, 20 quart (18.9 liter). Refrigerated to maintain mix below 41°F (5°C).

Indicator Lights
Mix Low light alerts the operator to add mix. When the Mix Out light flashes, the unit automatically goes into Standby mode to prevent damage.

Electronic Controls
Viscosity is continually measured to serve consistent quality shakes. The LCD (Liquid Crystal Display) readout will identify temperatures in the hopper or freezing cylinder at any point of operation. History of temperatures and times during the last 13 heat cycles may be viewed.

Standby
During long no-use periods, the standby feature maintains safe product temperatures in the mix hopper and freezing cylinder.

Shake Syrup System
Shake flavors are selected from touch pads. Self-contained air compressor delivers shake syrup from three, 1 gallon (3.8 liter) syrup tanks located in the lower front compartment. Use only single strength syrup, free from pulp and seeds.

Automatic Dispensing
Press the desired flavor and raise the draw handle. Frozen shake mix and syrup automatically blends to dispense the chosen flavor. After the shake is drawn, press the Rinse touch pad to eliminate flavor carryover. Rinse water connection under side of base is 3/8” FPT.
H60 Shake Freezer

Electrical
One dedicated electrical connection is required. See the Electrical chart for the proper electrical requirements. Manufactured to be permanently connected. Consult your local Taylor distributor for cord & receptacle specifications as local codes allow.

Beater Motor
One, 1.0 HP

Refrigeration System
One, 11,000 BTU/hr. R404A.
(BTUs may vary depending on compressor used.)

Air Cooled
Minimum Clearance: 6" (152 mm) on all sides. Minimum air clearances must be met to assure adequate air flow for optimum performance.

Water Cooled
Water inlet and drain connections under side of base 3/8" FPT.

Options
- Faucet
- Hopper Locks
